TECH STACK

Backend

Java 21, Spring Boot 3, REST APIs,
Spring Security / JWT, JPA &
Hibernate, PostgreSQL, Flyway,
OpenAPI

Frontend

React 18, TypeScript, Next.js, Tailwind
CSS, TanStack Query, Vite

Mobile

Flutter & Dart (iOS + Android), BLoC,
go_router, freedzed

Integrations

Stripe, Firebase Cloud Messaging,
Cloudflare R2 / S3, Twilio

Tools

Git, Gradle, Heroku, Postman, Swagger
UI

Other languages

C, C++, C#

Embedded

Microcontrollers, DSP, LTSpice

LANGUAGES

Romanian Native
English C1

Profile

Full-stack engineer who takes products from MVP to the app stores. Over six months I drove **Jobbin** — a recruitment platform with a Flutter app and a React dashboard — from prototype to public launch on the App Store and Google Play, owning the mobile client end to end. Before that, 16 months of production Java / Spring Boot work at TechQuarter on a system aggregating 10M+ hotel records. Currently building **EcoRegistru**, a multi-tenant compliance SaaS, solo.

Experience

Full-Stack Developer

Feb 2026 – present

Jobbin · jobbin.ro

Flutter · Spring Boot · React · TypeScript · PostgreSQL · Stripe · Heroku

- **Mobile:** sole developer on the Flutter candidate app (199 of 204 commits) — BLoC architecture, custom design system and animations, published to the App Store and Google Play.
- **Web:** own the React + TypeScript employer dashboard (190 of 268 commits) — job posting flow, applicant management, credits and billing.
- **Backend:** ship Spring Boot / PostgreSQL features alongside the original author (163 of 389 commits) — Stripe monetization with idempotent webhooks, unified in-app and FCM push notifications, role-based JWT authorization, file storage migrated to Cloudflare R2 with presigned URLs.
- Took the product from MVP to public launch in six months.

Junior Java Spring Boot Developer

Oct 2024 – Feb 2026

TechQuarter · Cluj-Napoca

Java · Spring Boot · REST APIs · Booking.com API · Postman

- Built the automated import pipeline ingesting **10M+ Booking.com hotel records** into the backend: API integration, JSON parsing and mapping, verified with Postman.
- Diagnosed and resolved complex software issues, contributing directly to more stable releases.
- Translated client requirements into technical specifications and delivered them alongside frontend, QA and product.

Projects

EcoRegistru — compliance SaaS

github.com/whoisonica/ecoregistru

Spring Boot 3.2 · Java 21 · PostgreSQL · Flyway · React · Vite

- Multi-tenant SaaS for waste tracking and SIM/AFM regulatory reporting, built solo end to end: request-scoped tenant isolation on every table, four access roles, Flyway-versioned schema.
- Monthly evidence engine aggregating waste movements into running stock balances; covered by integration tests including a dedicated tenant-isolation suite.

AtemSuite — real-time video analysis

Engineering thesis

C# · WPF · MVVM · OpenCV · LibAtem

- Desktop application that scores live camera feeds from a Blackmagic ATEM Mini switcher on brightness, contrast, motion and face detection, then switches automatically to the best source — with waveform, vectorscope and pixel-inspector tooling.

Education

Engineer's degree (BSc) — Electronics, Telecommunications & IT

2021 – 2026

Technical University of Cluj-Napoca
