TECH STACK

Backend
Java, Spring Boot, REST API, PostgreSQL

Frontend
React, Next.js, TypeScript

Mobile
Flutter (iOS & Android), BLoC architecture

Other languages
C, C++, C#, Dart

DevOps & Tools
Git, CI/CD, Heroku

Embedded
Microcontrollers, DSP, LTSpice

LANGUAGES

Romanian	Native
English	C1

Profile

Full-stack software engineer who takes products from idea to production. I built and launched Jobbin — a recruitment platform with a mobile app and a web dashboard — and I'm developing EcoRegistru, a compliance SaaS for waste operators in Romania. I have enterprise experience as a Java Spring Boot Developer at TechQuarter and I deliver client projects through my own company. Engineering graduate of UTCN (ETTI), which lets me work comfortably from the system level all the way up to the interface.

Professional Experience

Junior Java Spring Boot Developer

Oct. 2024 – Feb. 2026

TechQuarter · Cluj-Napoca

- Translated client requirements into technical specifications and implemented them in Java Spring Boot backend services, from analysis through delivery.
- Diagnosed and resolved complex software issues, contributing directly to more stable product releases.
- Collaborated with cross-functional teams (frontend, QA, product) to integrate new features into production.

Projects

Jobbin — recruitment platform

jobbin.ro

Flutter · Spring Boot · Next.js · PostgreSQL · Heroku

- Full-stack recruitment platform built from scratch, with end-to-end ownership: product, code, deployment.
- Mobile:** Flutter app (iOS & Android) with BLoC architecture, a custom design system and custom animations — UI designed entirely from scratch.
- Backend & web:** Spring Boot REST API (authentication, business logic, PostgreSQL with versioned migrations) consumed by the mobile client and the Next.js employer dashboard.
- Production:** deployment and maintenance on Heroku with a CI/CD pipeline.

EcoRegistru — waste compliance SaaS

Spring Boot · React · Flutter · PostgreSQL

- Multi-tenant SaaS platform for waste tracking and reporting (HG 856/2002, SIM/AFM reporting), aimed at Romanian operators.
- Domain validated with compliance-reporting specialists; architecture: Spring Boot backend, React web panel, Flutter mobile app.

AtemSuite — real-time video analysis

Bachelor's thesis project

C# / WPF · MVVM · OpenCV · LibAtem

- Desktop application for real-time analysis of the video signal from the Blackmagic ATEM Mini switcher: image processing with OpenCV and hardware control via LibAtem, on an MVVM architecture.

Education

MSc — Waste Recovery Engineering

2026 – present

Babeş-Bolyai University, Cluj-Napoca

MSc — International Business Administration (in English)

2026 – present

Faculty of Economic Sciences, University of Oradea

Engineer — Electronics, Telecommunications and Information Technology

2021 – 2026

Technical University of Cluj-Napoca
